### THE WORLD IN MAPS

THIS issue of the *Information Service* contains a series of outline maps, prepared especially for reference use in connection with reports to be published during the coming year, and supplemented by statistical data relating to the principal countries of the world.

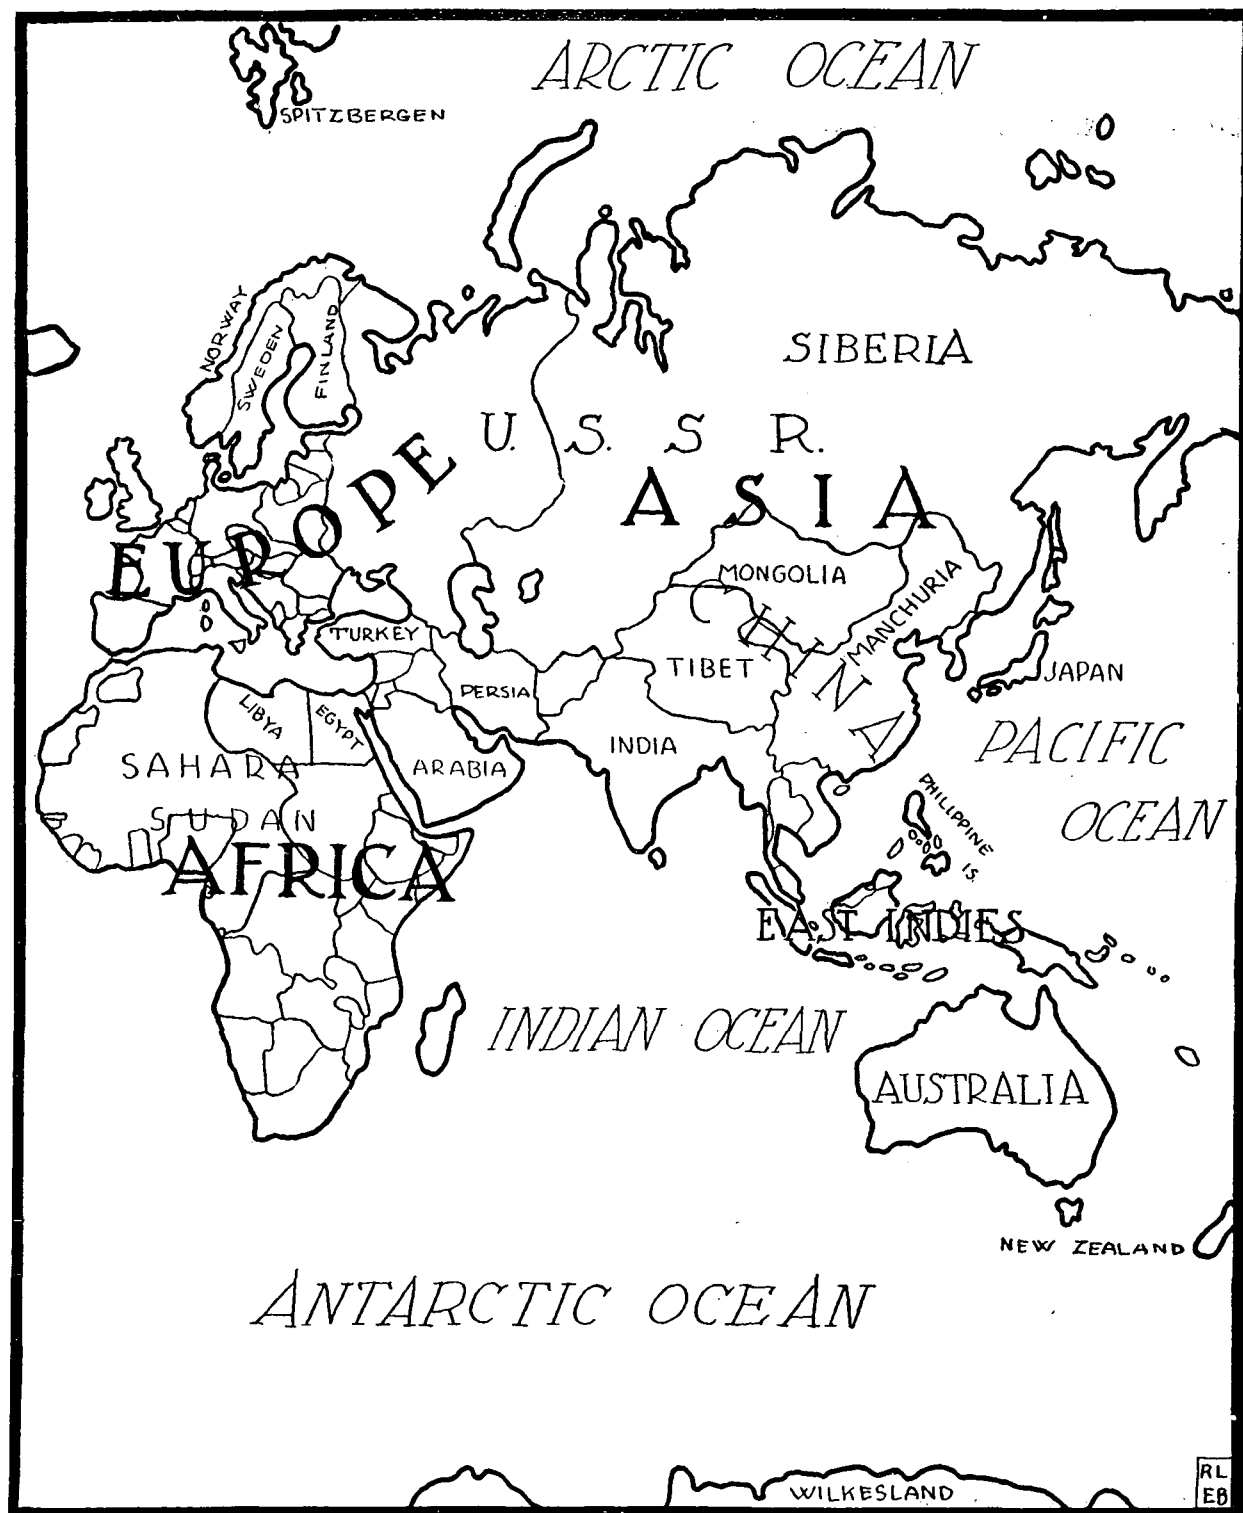

The map series includes Western Europe, Eastern Europe, Africa, the Near and Middle East, Soviet Russia, China and Japan, India, the East Indies and the Philippine Islands, Mexico, Central America, and the West Indies, South America, and

the Eastern and Western Hemispheres.

The figures of area and population used in the report are based primarily on *A Political Handbook of the World*, the *Statesman's Yearbook*, the *World Almanac*, the *Soviet Union Yearbook*, and the *China Yearbook*. Import and export statistics, governmental revenue and expenditure, and exchange rates are taken from the *Commerce Yearbook of the United States Department of Commerce* and the *International Statistical Yearbook of the League of Nations*. Whenever possible the year is given.
